

DS100 WALLING SPECIFICATION

GENERAL INFORMATION

- Due to the DS100 Mobile Stage being classed as a temporary structure, the walling system is therefore of a temporary nature.
- The actual system used is a PVC Temporary Structure Planking System.
- This is a High impact, weather resistant, black satin finish extrusion compound.

COMPOUND INFORMATION

- PVC Compound CRT01/079
- Chemical Nature: Polyvinyl chloride resin compound containing some or all of the following; stabilisers, fillers, lubricants and pigments.

HEALTH & SAFETY

- This PVC compound should not normally present any hazard to humans, by either inhalation, ingestion or skin contact. This compound contains no ingredients at a concentration at which they would be listed as hazardous to supply. It is exempt from hazard labelling under CHIP2, Regulation 9, and guidance Regulation Clause 168.
- Fire Retardant Properties: Rated as Class 1Y (most resistant) when tested to BS 476 Part 7 (1997). Also rated V-0/5v when subjected to the UL 94 flammability test.
- Copy of Report / Certificate available from Daytona upon request.
