

DS100 insurance summary.....

general information.....

We essentially carry two main types of insurance, below we will identify those types and the eventualities that they are intended to cover.

We will also outline what kind of insurance we expect you the event organiser to carry, what that insurance should cover and the values of our equipment.

Finally, you will find as a separate pdf a copy of our current insurance certificate.

liability insurance.....

We carry public & employers liability insurance with limits of indemnity of £10million each. This will indemnify Daytona Stage Hire in respect of our legal liability for damage to third party property, injury to third party persons and injury to our employees arising out of and in connection with our business activities.

equipment insurance.....

We carry adequate all risks insurance cover on the stage units & ancillary equipment to cover delivery, erection, time on site, dismantle & collection.

event organisers insurance obligations.....

It is the responsibility of all our hirers to arrange their own public & employers liability insurance for the events that they are organising, including any activities that will take place on or around the hired equipment.

At all points between the erection & dismantle of our equipment it is the responsibility of the hirer to arrange adequate all risks insurance cover on the hired equipment, this is mainly to cover any damage that could be caused by artists, public and or any third party contractors.

A copy of this insurance document is to be provided to ourselves as evidence of the hirer having adequate insurance cover prior to equipment being delivered to site.

equipment values.....

Daytona DS100 mobile stage @ £175,000
Mercedes Actros (or similar) hgv tractor unit @ £30,000
